

As a student, I want to record my time usage so that I can keep track of my activities efficiently.

As a user I want to be able to track time using a DATE FROM TO TASK TAG format

As a user I want to be able to search the data in my system.

As a user I want to be able to generate a report that lists all tasks between certain dates so I can better track my activities.

As a user I want to be able to export this report into a different format so I can track it.
